#### Photo Manipulation

on April 04, 2021

**Photo Manipulation** refers to a process of bringing changes to a digitized Photo for transforming it to a desired Photo. The changes are made possible by resorting to Photo processing. Photo manipulation is utilized to create magazine covers and albums from photographs.

[Here is some example of Photo manipulation:](#)

Many people think that **photo editing** and **photo manipulation** are the same thing but it's not true,

### What is the difference between photo editing and photo manipulation?:-

The application of **photo editing** is mainly for printing, advertisements, magazines, logo creation, website **images**, etc. At the same time, **photo manipulation** is done for attracting more customers by providing a different look, as in case of the requirements of animation companies.

There is many software to **manipulate photo** like **Adobe Photoshop,Luminar,Corel Paintshop,GIMP etc.** and you can also **manipulate photo** in your **smartphone** using application like **Snapseed,Picsart,LR etc.**

### My Experience :

I started learning **photoshop** during my HSC vacation. Initially I started learning through **udemy** and then I completed my course through **YouTube**.

**Photo editing** involves many other things like *retouch, template, magazine cover, poster making* but I am more interested in **photo manipulation** because through **photo manipulation** you can transform your imagination into an image.

With the help of **photo manipulation** you can tell the whole story through an image and you can give your message to the society through just one image.

There are many software available for **photo manipulation** but from my point of view **Photoshop** is the best software to **manipulate** any image because **Photoshop** gives full control of an image to the

Here is some manipulation that done by me:
